What Makes a Good Developer?

# Increasing Your Value

———— In a Polyglot World ————

# What Has Always Been True

# What Else Has Always Been True

# Ancient History

## Developers lived in monolithic silos

Vendors ruled and clear lines were drawn (e.g. Java vs. Microsoft)

# Balkanization

Everywhere

## User Interface

**UX pressure** combined with the device revolution and overlapping human-computer modalities

## The Data Layer

The era of **relational databases** is over

## The Business Layer

**Traditional OO** could not survive the changes both up and downstream

## Operations

**Speed and complexity** conspire to break down the walls between development and operations

# Continuous Stream of Disrupters

---

**01** Ongoing move to the cloud  
Industry-wide gorilla

**02** Internet of Things  
You've got mail... from your toaster.

**03** Analytics  
Disrupter du jour with Microsoft, IBM,  
Amazon and Google fighting it out

**04** DevOps  
Picking up speed as container technology  
continues to take over

*If you don't like change, **get out of  
the software business.***

- David Chappell

# The Polyglot Programmer

## And the Salary Plateau

# Roadmap

# What is a Consultant?

To break through the salary plateau, you must make the jump from...

The unfortunate cost  
of brute force  
success

To

The indispensable catalyst  
of breakthrough  
success

# What True Consultants Do

---

Don't just bring deep experience but also...

**Bring broad awareness to the table**

Don't just ask for requirements, but...

**Listen to understand unique needs and constraints**

Don't just identify workable designs, but...

**Craft creative solutions**

Don't just propose a project and a plan, but...

**Tell a story of success**

*Unless you are **influenced by my uniqueness**, I'm not going to be **influenced by your advice**. - Stephen Covey*

# The Path Forward

The unfortunate  
cost of brute  
force success

To

The indispensable  
catalyst of  
breakthrough success

Bring broad awareness to the table

Listen to understand unique  
needs and constraints

Craft creative solutions

Tell a story of success

*You've got to think about the **big things** while you're doing **small things**, so that all the **small things** go in **the right direction**.*

- Alvin Toffler

# 6 Near-Term Objectives

---

Manage Inspirational Energy

Learn Techsploration

Improve Your Ability to Focus

Conquer the imposter syndrome

Increase Connectedness

Find Your Voice

# Manage Inspirational Energy

Measure Inspirational Energy As a KPI

Stop blaming your day job

Focus on people and technologies that inspire you even if you don't see how they help your career

# Conquer the Imposter Syndrome

No one can know it all

Plan for JIT capability

Find premium online training (be willing to pay when you need it) – **Udemy, edX, Pluralsight, Xamarin University, etc.**

How to overcome article -  
[tinyurl.com/overcome-imposter](https://tinyurl.com/overcome-imposter)

# Learn Techsploration

Maintain a map of where you want to explore

Add collection habit to your daily routine

Use low-friction, high-visibility tools –  
**MindNode, MindManager, XMind**

Store index of critical sources

Learn how to avoid going deep

# Increase Connectedness

Online and Offline

Join meetups, go to hackathons, etc.

See you at the party tonight!

Provide value to others without being transactional

# Improve Your Ability to Focus

*A consulting practice is not a question of **volume of time** but rather **quality of focus**.*

- Alan Weiss

Learn how to ruthlessly single-task

Build personal systems for pursuing medium and long-term goals

Take time to find what works for you –  
**Stephen Covey, David Allen, Chris Winfield**

“How to get 40 Hours of Work Done in 16.7 Hours” - [tinyurl.com/focus-technique](https://tinyurl.com/focus-technique)

# Find Your Voice

Force yourself to get in front of people

Warren Buffet – This 1 Skill Will Boost Your Value 50% - [tinyurl.com/buffet-one-skill](https://tinyurl.com/buffet-one-skill)

Public speaking resources (mostly for techies) - [github.com/vmbrasseur/Public\\_Speaking](https://github.com/vmbrasseur/Public_Speaking)

*Anything worth doing is worth doing **poorly**.*

- G.K. Chesterton
